

Kenneth Kafunya

Product Designer | Frontend Engineer
Lusaka, Zambia

Kennethkafunya@gmail.com | [GitHub](#) | [My Portfolio](#)

PROFILE

Product-focused frontend engineer and designer experienced in building digital products from concept to MVP. I combine UX thinking with frontend development to create simple, practical software experiences. Comfortable working across design, code, APIs, and product decisions.

SKILLS

Product Design: User research, journeys, prototypes, UI design, design systems, UX improvement

Frontend: TypeScript, React, Next.js, JavaScript, HTML/CSS, component architecture

Tools: Figma, Supabase, REST APIs, Git/GitHub, Tailwind CSS, Bootstrap

PROJECTS

FNB Mobile Banking Redesign Concept

Product Designer

- Improved banking journeys through simplified UX flows.
- Created high-fidelity designs and reusable interface patterns in Figma.

Keep Lusaka Clean — Community Platform

Frontend Developer / Product Contributor

- Developed responsive interfaces and reusable components.
- Converted requirements into functional user experiences.

MediShift — Healthcare Locum Management Platform

Product Designer / Frontend Engineer (Private MVP)

- Designed healthcare staffing workflows and digital experiences.
- Built interfaces for authentication, profiles, verification, and shift management.
- Worked with databases and APIs to deliver product functionality.

PRODUCT APPROACH

- Focus on user outcomes, not only visuals.
- Balance design quality with technical feasibility.
- Comfortable moving between Figma, frontend code, and product discussions.
- Prefer shipping, learning, and improving through feedback.
